

## TecTANGO

Touch less access to shared workstations and business applications with a simple tap of a badge. Also supports badge tap as a IDP factor when launching Okta dashboard.

## TecUNIFY

SSO for legacy system and applications like AS400, thick apps and other apps which do not support SAML/OIDC

## TecON

TecON Addresses the complex online/offline use cases for military, healthcare and other verticals. Providing hybrid capabilities which enables users access to the full feature set of okta when cloud connectivity is available, but remain productive within the denied, disconnected, intermittent, or limited (DOIL) Communications environment

## TecMFA

Desktop MFA in online & offline mode for domain and non-domain joined machines to meet MFA mandate from government and cyber-Insurance agencies. Supports various Okta factors and biometric factors like fingerprint or face to unlock machines.

## TecSSPR

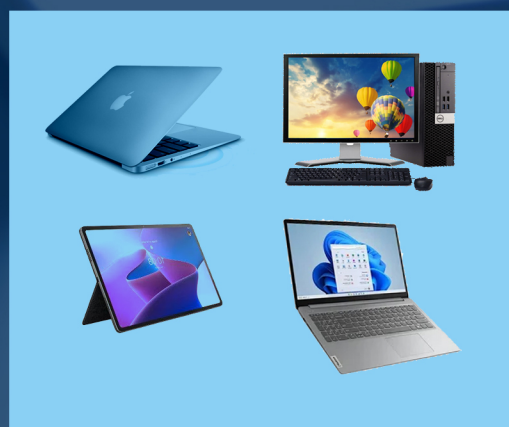

Password recovery from the lock screen of the machine by leveraging on Okta MFA factors or face.

## TecREACH

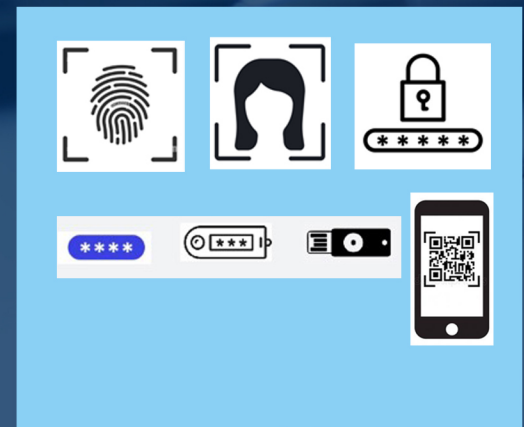

Optimize Okta for Mainland China and Beyond: Addressing Latency, Data Privacy, and Cross-Border Regulations. Okta's identity and access management solution can now be seamlessly deployed in Mainland China, the Middle East, and other countries.
